

Title: **Principles of Good Health Technology Assessment (HTA): Lessons from Pharmaceutical Reimbursement in Australia and Asia Pacific**

Presenter's Name **Mr. Steven Crowley**

Date: Tuesday 30th June 2009
Time: 12.30 to 1.30 pm
Venue: Melbourne School of Population Health
Room 405A, Level 4
207 Bouverie Street, Carlton

The seminar will cover:

HTA is increasingly being used, in Australia and international, to inform decisions to Government decisions to reimburse new technologies. This presentation will outline some key principles of good HTA processes, structures and technical aspects of the assessment itself. The discussion will be based on the international literature as well as the presenters own experience with HTA in working in both academia and industry in Australia and the Asia-Pacific.

Presenter

Steven Crowley is a part-time senior lecturer in health economic at the Centre for Health Policy, Programs and Economics. In this capacity he coordinates and teaches economic evaluation subjects to MPH students. In addition to his university work, Steven runs a consultancy business in health economics providing services to the pharmaceutical and medical device industry both in Australia and overseas. Steven has held senior management positions within the pharmaceutical industry both in Australia and Asia-Pacific
