This is a one day course that provides an introduction to the application of cost effectiveness analysis in health. Specifically this course will provide participants with an understanding of how economic analysis can be used to assist with the evaluation of health interventions and programs and how this information can aid decision making. The course will consist of short lectures, case studies and practical class exercises. No prior knowledge is assumed.

Course Outline:
Module 1: Introduction to Health Economics
Module 2: Cost measurement
Module 3: Outcome measurement
Module 4: Interpretation of economic evaluation results for policy
