The ENCORE Program presents

How can we respond to the growing burden of non-communicable diseases in low- and middle-income countries?

Strengthening collaborations and building research capacity between India and Australia

Thursday the 5th of May
9:00am – 3:00pm
Basement Theatre 1 - 207 Bouverie Street
Carlton, The University of Melbourne

The ENCORE Program will present its inaugural research forum on health trends and drivers of the non-communicable disease epidemic in India and how the global community can build capacity to respond. Innovative ways to halt the growing burden of non-communicable diseases will be discussed and their intersection with approaches to infectious disease control.

Speakers from leading public health research institutes in India and the University of Melbourne will include:

Additional speakers include: Prof Nihal Thomas (CMC Vellore, India), Dr Sailesh Mohan (PHFI), Prof Stephen Harrap (Dept. of Physiology), Prof Jane Gunn (Dept. of GP), Prof Bernadette McSherry (Melbourne Social Equity Institute), Prof Ajay Mahal, Dr Nathan Grills & Prof Alan Lopez (Melbourne School of Population and Global Health).
